

WOLF SCOUT👤

FACTION RULE

HUNTING ASTARTES

Wolf Scouts are experienced Space Marines who are utterly lethal on the hunt. These genetically modified superhumans are merciless warriors capable of exploiting strange climatic events to conceal their approach.

During each friendly **WOLF SCOUT👤** operative's activation, it can perform either two **Shoot** actions or two **Fight** actions. If it's two **Shoot** actions:

- 1 additional AP must be spent for the second action if both actions are using a plasma gun or plasma pistol.
- You cannot select two **PSYCHIC** ranged weapons.

Each friendly **WOLF SCOUT👤** operative can counteract regardless of its order. Whenever it does so within your **STORM**, you can change its order first, or change its order instead of performing an action (for the latter, still treat it as having counteracted this turning point).
