Obsessive Bloodlust: Once during each of this operative's activations, when this operative ends the **Fight** action, if it's no longer within control range of enemy operatives, you can use this rule. If you do, it can immediately perform a free **Charge** action (even if it's already performed the **Charge** action during that activation), but it cannot move more than 2" during that action. Doing so doesn't prevent it from performing the **Charge**, **Dash** or **Reposition** action afterwards during that activation.
