

NEMESIS CLAW

STRATEGY PLOY

PREYSIGHT

The Night Lords seem able to sense the fear of cowering prey, hunting down the craven with unerring precision.

Whenever you're selecting a valid target for a friendly **NEMESIS CLAW ** operative, enemy operatives within 6" of it cannot use Light terrain for cover. While this can allow such operatives to be targeted (assuming they're visible), it doesn't remove their cover save (if any).
